Deployment steps

Two files were added to the application previously created on the 4th week: *Procfile* and *Requirements*

The deployment was done through Heroku website.

First, I have connected my GitHub with my account in Heroku.

The app was then connected to from GitHub to Heroku.

Choose a branch to connect the application.

Enable automatic deploys from GitHub

Every push to the branch you specify here will deploy a new version of this app. **Deploys happen automatically:** be sure that this branch is always in a deployable state and any tests have passed before you push. Learn more.

Choose a branch to deploy

main

☐ Wait for CI to pass before deploy

Only enable this option if you have a Continuous Integration service configured on your repo.

Enable Automatic Deploys

Deploy the branch.

Deploy a GitHub branch

This will deploy the current state of the branch you specify below. Learn more.

Choose a branch to deploy

⌥ main ⇕   **Deploy Branch**

The app is now active and running.
